<i>SP-24-06</i>	<i>Staff Report – August 19, 2024</i>
<i>Application Type:</i>	Special Use Permit
<i>Project Address:</i>	1133-37 Salina St. S & Raynor Ave. E (Tax Map ID: 094.-19-11.0)
<i>Summary of Proposed Action:</i>	The applicant proposes to remove the light automobile repair land use type and expand the existing on-site convenience store into the space used for the automobile repair. The applicant also proposes to establish 6 on-site vehicle parking spaces (including 1 ADA parking space).
<i>Owner/Applicant</i>	Mark E Mondo (Owner) James Owen, JM Owen Design, LLC (Applicant)
<i>Existing Zone District:</i>	Mixed-Use Transition, MX-3 Zone District
<i>Surrounding Zone Districts:</i>	The neighboring properties to the north, east and west are the Mixed-Use Transition, MX-3 Zone District, and to the south is within the Neighborhood Center, MX-2 Zone District.
<i>Companion Application(s)</i>	MiSPR-24-14: interior and exterior build-out for an on-site convenience store.
<i>Scope of Work:</i>	Change the land use type of the portion of the building for light automobile repair to food and beverage retail (convenience store). The exterior renovations include replacing the siding, installing new windows and doors, and establishing 6 on-site vehicle parking spaces in addition to converting the existing automobile repair bays to a functional storefront wall with associated interior renovations and equipment.
<i>Staff Analysis:</i>	<p><u>Factors:</u></p> <ul style="list-style-type: none"> - This proposal converts the nonconforming automobile repair land use into a conforming food and beverage retail land use. - Less pollution is expected to be caused by the convenience store than the automobile repair land use. - The provided bike parking spaces provides convenience to the nearby bike trail. - The subject property is located in a flood plain area, while this property has impervious coverage at almost 100%. - The impervious surface coverage is a legal non-conforming site feature because previous Special Use Permits approved site plans that covered the entire lot. - ReZone amendment effective 7/22/24 allows parking between front setback and ROW, pursuant to Art. 3 Sec 3.3C 11(j). <p><u>Suggested Conditions:</u></p> <ul style="list-style-type: none"> - Vehicles parking shall not encroach into the sidewalks. - Buffers (landscaped or fencing) shall be provided to prevent cars from parking on the sidewalk and within the ROW along E. Raynor St.
<i>Zoning Procedural History:</i>	<ul style="list-style-type: none"> - SP-76-11 Special Use Permit. Initial approval to convert all pump islands from regular to full service. Approved on 4/27/1976 by CPC. - SP-76-11 Special Use Permit. Non-substantial change to convert full-service gas station to self-service gas station and install signs. Approved on 8/3/1976 by CPC. - SP-76-11 Special Use Permit. Non-substantial change to install a 13.5-foot-high pump island canopy. Approved on 3/1/1977 by CPC.
<i>Summary of Zoning History:</i>	All the pump islands of the gas station at 1133-37 Salina St S & Raynor Ave E were converted into full service in 1976. 2 months after the approval, the gas station was converted into a self-service gas station. In 1977, the installation of a pump island

	canopy for the gas station was approved.
Code Enforcement History:	See attached code enforcement history.
Zoning Violations:	The proposed lot has no zoning violations.
Summary of Changes:	This is not a continued application.
Property Characteristics:	<p><u>Existing Property Characteristics</u> The subject property is regular in shape with 100.00 feet of frontage on South Salina Street and 89.70 feet of frontage on East Raynor Street. The total lot size is 8,970 SF.</p> <p><u>Proposed Property Characteristics</u> There will be no changes to property characteristics.</p>
SEQR Determination:	Pursuant to the 6 NYCRR §617.5(c)(18), the proposal is a Type II Action.
Onondaga County Planning Board Referral:	<p>Pursuant to GML §239-l, m and n, the proposal meets the criteria to be referred to the Onondaga County Planning Board. The Board has no opposition against the proposal but has following comments:</p> <ul style="list-style-type: none"> - The Board strongly encourages the City and applicant to work to minimize pavement and to incorporate green infrastructure where possible, in order to minimize stormwater runoff from such an intensely impervious surface

Project Summary:

The applicant is proposing to renovate a former auto repair and gas station facility into a convenience store and gas station at the corner of South Salina Street and Raynor Avenue, south of Downtown Syracuse. The existing facility contains an approximately 1,606 sf building located in the northeast corner, three gas pumps with an overhead canopy, and asphalt parking area extending to the property boundaries. The site has unrestricted access to both East Raynor Street and South Salina Street and informal parking around the property. The applicant will remove the existing service bay doors and expand the existing retail area to convert the whole building to a convenience store. Also proposed are façade improvements and striping of 6 parking spaces. Per the application, no other improvements or changes will be made to the site.

The entire site is located in the flood plain for Onondaga Creek and per the Environmental Assessment Form dated 2/15/24, stormwater “runoff will run to existing street gutter & porous asphalt surfaces adjacent to existing sidewalks.”

3. Will the proposed action impair the character or quality of the existing community?		
4. Will the proposed action have an impact on the environmental characteristics that caused the establishment of a Critical Environmental Area (CEA)?		
5. Will the proposed action result in an adverse change in the existing level of traffic or affect existing infrastructure for mass transit, biking or walkway?

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered “moderate to large impact may occur”, or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
