

CITY OF SYRACUSE

LEAD HAZARD CONTROL OFFICE

LOCAL LEAD TESTING AND REMEDIATION PROVIDERS

Centek/SanAir Technologies Laboratory

An accredited, diversified environmental testing lab providing analytical and consulting services to detect and identify asbestos, lead and metals, environmental microbiology, bacteria, legionella, and other environmental hazards such as VOCs in indoor air quality.

CNY Lead Testing

An EPA-certified risk assessment firm specializing in lead dust inspections, risk assessment, hazard reduction, and remediation and abatement strategies.

CNY Environmental Solutions

A lead inspection, risk assessment, and remediation company focused on reducing the presence of lead in homes. CNYES provides comprehensive lead testing and remediation services for both residential and commercial properties.

FDL and Partner

An EPA-certified firm specializing in creating lead-free environments for properties. Services include professional abatement to remove lead-based paint and other hazards, inspections and assessments to maintain a lead-free environment, and dust-wipe testing to verify post-lead clearance standards.

Jax House Inspections

Provides lead sampling services and helps owners understand the results. Jacki and Scott are both EPA-Certified Lead Dust Sample Technicians and Scott is certified by the Renovation, Repair and Painting Program (RRP).

Lead Safe

A certified Women-Owned Business (WBE) providing lead testing, lead-based paint risk assessment, inspection, job specification development, clearance examination, consulting services and more.

Maye Development

Evaluates properties for lead hazards by providing lead inspections, dust-wipe sampling, or a full lead risk assessment.

Paradigm Environmental Services

An environmental consultancy and material testing laboratory serving commercial and residential clients across NYS.

Qualtek Testing Group

Provides lead-based paint inspections, risk assessments, and clearance inspections in accordance with state, USEPA, and/or U.S. Department of Housing and Urban Development regulations and for OSHA purposes. Qualtek also has the expertise to test surface dust, water, and bare soil for lead content.

RPM and Construction Services

Full service general contractor offering lead remediation and testing services. Locally owned and operated with multiple employees trained for cleaning, abating, stabilizing, and testing for lead-based paint activities.

Trident Construction and Mechanical Services

Specializes in lead-based paint testing to meet the requirements of the City of Syracuse Lead Ordinance as well as remediation and abatement of all lead-based paint hazards.
